## **CDO ROUND-UP: C-BASS REPACKAGES BONDS, TAPS THE MARKET**

**Credit Based Asset Servicing and Securitization** (C-BASS) will become one of the first home-equity/mortgage shops also to be a collateralized debt obligation (CDO) portfolio manager.

The \$260 million deal, which is backed 65% by residential mortgage-backed securities and 35% by asset-backed securities, is being led by Credit Suisse First Boston. At press time, CSFB was pre-marketing the equity piece. The bonds backing the deal have an aggregate average rating below triple-B-minus, according to rating agency source.

"What's unique about this one is that there's going to be a lot of non-investment grade subordinate tranches in it," said an agency source. Most of the current asset-backed CDOs tend to hover around the triple-B quality range, the source added.

C-BASS has been a regular issuer of both asset and mortgage-backed securities.

The company brought five transactions for nearly \$1 billion to the ABS market last year, according to Thomson Financial Securities Data. In addition to its servicing operations and home-equity term deals, C-BASS is also an investor of subordinate bonds. As one source put it, "They buy the tranches that have the most juice."

Because C-BASS tends to buy the riskiest bonds, they usually retain special servicing rights on the deals.

C-BASS has done re-securitizations in the past, through structures that are comparable to

net-interest margin repackagings (NIMs), one source said.

However, CDOs of ABS were one of last year's blow-out trends, and, according to the rating agencies, it's not surprising that the market is seeing less traditional collateral manager types tapping the arbitrage vein.

Ironically or not, the rating agencies continue to release default studies demonstrating how well securitized products perform in the long term, when compared to corporate debt. A source noted the likelihood that the agencies are responding to this growing market of CDOs that repackage ABS, MBS and CMBS.

### **CDOs Circling**

Also in the market last week, Netherlands' based M&G Investment Management Ltd (Prudential M&G) will manage a portfolio of various classes of fixed- and floating-rate notes in a European arbitrage CDO called Panther CDO I BV. The transaction comprises five tranches totaling GBP313 million in all. Morgan Stanley Dean Witter is underwriting the deal.

The proceeds will be invested in a £300 million portfolio of investment-grade and high-yield bonds, private placements, bank perpetuals, structured finance securities and senior secured loans according to the presale report.

The issue will be carved into two senior tranches, a £240 million class I and a £32 million class II. The mezzanine class III will be £17.5 million in size and there will also be subordinated notes and combination notes for £23.5 million and £5 million respectively. All tranches mature in 2016

Also last week, Lehman Brothers priced the \$300 million Saybrook Point CBO. Collateral manager on the deal is General Re/New England Asset Management.

Quietly some bankers were admitting that selling the equity in CDOs is not as easy as it could be with the string of bankruptcies the U.S. has seen in the recent weeks and more than a few CDO downgrades of late.

For example, CDO investors were in shock that within one month two triple-A rated CDO transactions had been downgraded for the first time. NorthStar 1997-2 was dinged by Standard & Poor's on Jan. 4 to AA from AAA and Fitch downgraded the deal to AA+ from AAA on Jan 5.

Eisberg Finance Ltd.

also known as BISTRO 97-1000 was downgraded to Aa1 on watch for downgrade from Aaa.

LONDON, Nov. 9 /PRNewswire/ -- Preliminary ratings have been assigned to the class A-2, A-3, B, and C notes to be issued by special-purpose entity Beethoven CDO S.A. (see list below).

Beethoven CDO S.A. is an arbitrage collateralized debt obligation (CDO) transaction managed by Deutsche Asset Management International GmbH as portfolio adviser and DWS Finanz-Service GmbH as adviser. The assets being securitized comprise a portfolio of euro- denominated investment-grade debt securities and synthetic securities.

The preliminary ratings reflect:

- The expected commensurate level of credit support in the form of subordination to be provided by the notes junior to the respective classes;
- The cash-flow structure, which is subject to various stresses requested by Standard & Poor's;
- The experience of the portfolio adviser and adviser;
- The coverage of interest-rate risk through hedge agreements; and
- The legal structure of the transaction, which includes the bankruptcy-remoteness of the issuer.

A copy of Standard & Poor's complete presale report for this transaction is available on RatingsDirect, Standard & Poor's Web-based credit analysis system, at <http://www.ratingsdirect.com>. The report is also available on Standard & Poor's Ratings Services Web site at <http://www.standardandpoors.com>. Under Presale Reports, select Structured Finance, then Asset-Backed Securities.

**Scudder Global High Income Fund Inc. Declares Dividend***Business Editors. Business Wire. New York: Jul 2, 1998. pg. 1***Abstract (Summary)**

(BUSINESS WIRE)--July 2, 1998--The Board of Directors of Scudder Global High Income Fund, Inc., formerly The Latin America Dollar Income Fund, Inc., today declared a dividend of \$0.375 per share, payable on July 31, 1998, to stockholders of record as of July 20, 1998.

**Full Text (326 words)***Copyright Business Wire Jul 2, 1998*

NEW YORK--(BUSINESS WIRE)--July 2, 1998--The Board of Directors of Scudder Global High Income Fund, Inc., formerly The Latin America Dollar Income Fund, Inc., today declared a dividend of \$0.375 per share, payable on July 31, 1998, to stockholders of record as of July 20, 1998.

The Board voted to maintain the Fund's historical dividend of \$0.375 per share for the quarter ended June 30, 1998. The Fund is currently earning income to support this dividend level. However, as previously disclosed on April 2, 1998, there is still the possibility that stockholders will have a return of capital at fiscal year end. Therefore, a portion of this dividend may be derived from capital gains or may be treated as a nontaxable return of capital distribution. The final tax status of the Fund's 1998 distributions will be determined at the end of the year.

The current distribution rate represents an 11.70% yield based on the June 30, 1998, closing market price of \$12.8125, and a 12.57% yield based on the NAV of \$11.93 on June 30, 1998. The yield based on the original offer price of \$15.00 is 10%. Both the distribution rate and the yield are based on current market conditions and may not be indicative of future performance.

Scudder Global High Income Fund, Inc., a non-diversified closed-end management investment company, is listed on the New York Stock Exchange under the symbol LBF. The Fund's investment objective is to seek high current income through investment in a portfolio of emerging markets debt instruments.

Scudder Kemper Investments, Inc. is one of the largest and most experienced investment management organizations worldwide, managing more than \$200 billion in assets globally for mutual fund investors, retirement and pension plans, institutional and corporate clients, insurance companies and private family and individual accounts. It is one of the ten largest mutual fund companies in the U.S.

For more information, please call Thomas F. McDonough, Secretary of the Fund, at (617) 295-2567. SEQN: BW1238

# Mutual Bonds: A colossal undertaking

Forsyth, Randall W

Barron's National Business and Financial Weekly; Jan 4, 1993; ABI/INFORM Global

pg. 31

January 4, 1993

BARRON'S / MUTUAL FUNDS

Page 31

Cont. from Preceding Page

lent of cellular reproduction: As increased use of peripherals makes networks more complex, they start dividing, like cells in mitosis. That creates even greater demand for routers to re-integrate them, which in turn has meant gangbusters business for Wellfleet: annual sales growth of 50% even in a recessionary economy.

Although Wellfleet trails Cisco Systems (also in Alger's portfolio), having sold approximately 8,000 units compared with perhaps 10 times that many sold by the much larger com-

pany, it is Cisco's only significant competitor in a market that has been scarcely scratched. Given those variables, Alger expects Wellfleet to earn \$1.60 a share in the June 1993 fiscal year, up smartly from 95 cents last year, and \$2.40 in 1994. On a calendar-year basis, he's figuring on \$2 a share in 1993.

Turning away from our hottest stock pickers of six to 18 months ago, there remains one other choice deserving of acknowledgment: Circus Circus Enterprises, which made it into last year's top 10 after getting the nod in March 1991 from Loris Muzzatti of Seligman Cap-

ital. Thirteen months later it was seconded by Clifford Krauss, manager of Eaton Vance Special Equities, and rewarded its fans with a 23.1% gain through Dec. 28.

On the other hand, the lack of any other repeat recommendations underscores Wall Street's fickle nature: Four of the stocks that made it into last year's list of best performers were health-care issues—a category notably absent from this year's roster. That alone should underscore the basic wisdom underlying most mutual fund philosophies: diversify, diversify, diversify.

## Mutual Bonds

Portfolio Analysis Of  
Selected Fixed-Income Funds

### A Colossal Undertaking

By RANDALL W. FORSYTH

IBM and GM aren't the only colossi having to mend their ways. The Putnam American Government Income Fund also has been forced to downsize and change its basic approach to doing business. In the case of the Putnam fund, there are signs that the turnaround is taking place.

Previously known as the Putnam High-Income Government Trust, it burgeoned into the third-largest bond fund, with assets peaking at \$11 billion in 1987. That growth, however, came from promising more than it could deliver. Through the legend of options writing, the fund sought to pay out a higher yield than the portfolio's securities earned, which obviously was untenable. (Mutual Bonds, Aug. 1, 1988.) In 1989-90, the fund changed tactics by supplementing income with short-term capital gains, including those from options and futures trading, which didn't work out much better.

Investors deserted the fund in droves after its consistent underperformance, and its net-asset per share value has shrunk by one-fourth since its inception. As the fund's total assets dropped to about \$4 billion, Putnam's management fees also fell, by \$30 million from their peak. And, as with the industrial behemoths, this record of underachievement forced dramatic changes, the fund's name being the least of them.

Two new co-managers, Kenneth Taubs and Max Senter, took over early in the year, with the assignment to change the fund's basic aim. Options and other tricks to boost yield were out, total return and stable NAV were in.

The Putnam American Government Income Fund's new emphasis is on CMOs, or collateralized mortgage obligations. CMOs take garden variety Freddie Mac, Fannie Mae or Ginnie Mae mortgage-backed securities and slice them into individual pieces, or tranches, with specific investment characteristics.

The ability to use CMOs in a government fund is rare, says Taubs. Putnam's size, moreover, also confers certain advantages. "We have the ability to go to a broker-dealer and say to them, 'We need a certain type of bond, with a certain maturity, certain yield characteristics, for a certain investment portfolio.' We are able, therefore, to drive a lot of CMO deals that are done. A very neat position for a mutual fund, I think."

Out of a 7½% Fannie Mae, Putnam, using its clout, can garner a security with the yield of a 9% or 10% mortgage-backed

security. The fund can also enjoy vastly reduced cash-flow uncertainty from a PAC, or planned amortization class, CMO. There's no magic to the alchemy, however. "The CMO market is a zero-sum game. Someone is holding the bag, so to speak," Taubs notes. That frequently is the individual investor, who typically buys the "support" tranche that absorbs the cash-flow risk from the PAC class, for a smidgeon more yield. "We don't think individuals should be investing in CMO bonds for that reason," he adds.

While CMOs currently comprise 20% of the fund's portfolio, 40% is in underlying "collateral" mortgage securities (what the Street calls issues that haven't been sliced and diced into CMOs). Taubs emphasizes that the fund is concentrating on issues that have relatively stable cash-flow characteristics, rather than those that throw off the highest current yield. Those primarily are 8½% issues that have been seasoned, which tend to have more predictable prepayment characteristics.

The remaining 40% of the Putnam American Government Income Fund's holdings are Treasury securities. This portion of the portfolio is used to adjust its duration, which is a measure of its price sensitivity to interest-rate movements. But Taubs has shifted the allocation toward mortgage securities, as their yield advantage over Treasuries increased in recent months.

All of which adds up to a significant change in direction for the Putnam American Government Income Fund. Turning around such a supertanker isn't easy, but its returns now are about par for the group. Too bad it took nearly four years since Barron's brought its shortcomings to light.

## \$11,750.00 PROFIT IN 5 MONTHS TRADING APPLE COMPUTER STOCK WITH OUR STOCK PROGRAM!

| Symbol | Type  | Price | Quantity | Cost       | Profit/Loss | %     |
|--------|-------|-------|----------|------------|-------------|-------|
| APPL   | Buy   | 50.00 | 100      | \$5,000.00 |             |       |
| APPL   | Short | 65.00 | 85       | \$5,525.00 | \$525.00    | 10.50 |

### COMPUTERIZED TRADING FOR THE REST OF US.

If you had purchased our Right Time-Stock Program in December, 1991, followed just the signals for Apple Computer, the rules in the manual and used a little common sense, your profits within the five month period shown above would have been \$11,750.00. Remember this is a remarkable amount considering the fact that the software costs only \$59.00.

Our Right Time Software is the best decision support system ever devised for traders. It's the only software that analyzes volume/price, support/demand, and global market trends all at the same time, and can give you profits like those shown here.

### AMAZINGLY PRECISE.

Our Right Time™ programs run on IBM (and compatible), Apple II and Macintosh computers. The software is easy to use, amazingly precise, and very, very fast in its signals. You can retrieve and update signals for your stocks, commodities, indices or funds from Dow Jones, Warner, Signal, DBC, Bonneville or the Radio Exchange in less than 5 minutes per day. What's more, you can play "What If" games and have results in less than a second.

### RESULTS: WINNING TRADES.

There are nine Right Time™ programs available to help you make the right decisions at the right time.

- Stock Program or Stock Program/Long Term
- Index Program or Index Program/Long Term
- Futures Program
- Mutual Funds Program
- Day Trading Program/Indices, Futures or Stock

### FOR MORE INFORMATION OR TO PLACE AN ORDER.

Call (714) 721-8603 or write today for our free twenty-four page brochure to place your order. Each of our end-of-day programs costs \$99 (combination prices are available) plus shipping and handling (\$6.00).

We also have demonstration programs for just \$59 (each) plus \$6.00. Each demo includes our complete manual.

Our Right Time-Day Trading Programs (Indices, Futures or Stock) are priced at \$999 each plus \$6.00.

## BEARISH?

WE FIND COMPANIES THAT HAVE POOR BALANCE SHEETS, QUESTIONABLE ACCOUNTS, FINANCIAL IRREGULARITIES AND WE SELL THEM SHORT FOR OUR CLIENTS.

Collateralized debt obligation management method for transaction, involves changing obligation of deal linked to debt index under terms of agreement between sponsor and asset manager, on changing debt obligation in index

...to the debt index under the terms of an asset management agreement between sponsor and asset manager. An obligation of the linked deal is changed, in response to the change of the debt obligation in the index.

#### Class Codes

International Classification (Main): G06F-017/60

#### Original Publication Data by Authority

#### Original Abstracts:

A portfolio of debt instruments, managed by an asset manager according to the terms of an asset management agreement between the asset manager and a sponsor, is a debt index. Multiple deals, as collateralized obligations, are linked to the debt index. Changes to the index by the asset manager are reflected in the linked deals. A break in the linkage to the index can be triggered by different events.
